

**2<sup>nd</sup> Multidisciplinary International Musculoskeletal Pain Congress cum  
11<sup>th</sup> Multidisciplinary Musculoskeletal Ultrasound Congress on Pain Management  
12 – 14 April 2024 • Hong Kong**

**Ban Tsui**

*Adjunct Clinical Professor*

*Department of Anesthesiology, Perioperative and Pain Medicine*

*Stanford University*

*USA*

Ban Tsui, MD, MSC, specializes in pediatric and adult anesthesiology. His research endeavors to develop regional anesthesia from an "art" to a dependable and replicable "science" through an in-depth investigation of the fundamental scientific and clinical facets of electrophysiological signal monitoring, coupled with the most recent developments in ultrasound. Dr. Tsui is strongly interested in mentoring and motivating medical students, residents, and anesthesiologist fellows to incorporate research into their clinical practice. The Canadian Anesthesiologists' Society (CAS) bestowed upon Dr. Tsui the prestigious CAS Research Recognition Award in 2015 "*in recognition of significant research contributions to pediatric anesthesia, acute pain management, and regional anesthesia in Canada and around the world.*" In 2022, the American Society of Regional Anesthesia and Pain Medicine (ASRA) awarded Dr. Tsui the Distinguished Service Award. This prestigious annual award has been presented to honor persons who have made remarkable contributions to regional anesthesia and pain medicine.

Previously, Dr. Tsui held the positions of director of pediatric regional anesthesia at Stanford University, full professor, and associate chief of the division of regional anesthesia. In addition to his recent appointments and esteemed roles of associate dean, presidential chair professor, and chair/chief of the department of anesthesiology, critical care, and pain medicine at the Chinese University of Hong Kong (Shenzhen), Dr. Tsui continues to serve as an adjunct clinical professor at Stanford University.
